

Problem Evaluation Committee
March 30, 1978 Meeting

The meeting was attended by Ron Willson, Dick Sprague, Dennis Swanson and Rich Christensen. The following problems were discussed:

Cedar Springs WWTP - No additional recommendations.

American Anodco Corporation, Ionia - No additional recommendations.

ITT Hancock - No problem.

Ford Motor Company, Saline - No problem with discharge to surface or groundwater. No recommendations.

Brown Corporation, Ionia - Added the following recommendation:

2. District staff should collect additional grab samples of the outfall for permit development.

Globe Union, Owosso - Recommendations:

1. Sample for all metals the company reports using in their surveillance fee report. A wastewater survey should be conducted in the near future and grab samples should be collected by district staff during plant visits.
2. The sludges in the Shiawassee River below the plant should be re-sampled and analyzed for metals.
3. Determine if the lagoons are lined and if there is a possibility of groundwater contamination. Sample the groundwater including private wells in the area if the lagoons are not lined.
4. Investigate the possibility of sampling the local duck population for metals especially lead.

Port of Monroe Landfill - This problem was discussed at length. No recommendations were made at this meeting.

The following assignments were made during the meeting:

Andy Hogarth - Hexcel Corporation
Fill Farms

Dave Batchelor - Crew Products
Port of Monroe Landfill

Ron Willson - Kraft Foods
Port of Monroe Landfill

Dick Sprague - John Henry Company
Parsons Chemical, Grand Ledge

Dennis Swanson - Dow Chemical, Midland

Rich Christensen - Crystal Refining
Dow Corning Corporation

All committee members should begin reviewing problems noted in District III and pick out the problems the committee needs to review.

The next meeting is scheduled for Thursday, April 13, 1978 in the South Conference Room at 1:30 p.m.
